AGC

2019 Conference on Surety Bonding and Construction Risk Management

Breakout Session on
Emerging Technologies: Subcontractor Risk
New Technology and Greater Confidence in its Value

advances in information technology, new paradigms and the related opportunities for assessing risk

Leaders in the field of information technology are not content to streamline and otherwise improve the subcontractor prequalification process. They are also striving to enhance the business insights that the process generates. Construction contractors are beginning to take note as paradigms shift. How quickly and completely contractors embrace and integrate the new solutions remains far from certain.
Panelists

- **Douglas Schrift (Moderator)**
  SDI Managing Director, Aon

- **Greg Horne**
  AVP Contract Surety, Liberty Mutual

- **Michael Ho**
  CEO, Bespoke Metrics

- **Justin Levine**
  Co-Founder, TradeTapp by Building Connected
Overview

1. Emerging Trends
2. Finding the Value
3. Innovation & the Future of Predictive Analytics
Emerging technology driving new solutions:
- Challenges and acceptance
- Driving industry change
Finding the Value

- Business efficiencies
- Enhanced data and insights
Innovation / Future Impact

- The future of predictive analytics
- Leveraging technology as a competitive differentiator
Thank you.
